Points to note

1. Locate the filter screen: usually, the projector's filter screen is at the bottom or side of the projector.
2. Turn off the projector and power off: when changing the filter screen, first make sure the projector is off and power off.

In short, changing the filter screen is very simple. As long as the correct steps to operate, and pay attention to safety, can be successfully completed to replace the filter, so that the projector can work properly to avoid the impact on power and other components. At the same time, the service life of the projector can also be extended.
