Packing	Carton box with foam
Minimum Order quantity	10 piece

Points to note

1. Turn off the machine and unplug the power supply before dust removal.
2. Do not use hard objects to wipe the lens, otherwise it will damage the projector's coating or cause scratches on the lens.
3. Do not use alcohol, benzene, thinner, volatile solvents, pesticides, etc.
4. If there is dirt and it is difficult to wipe it off, soak the cloth in detergent without harmful substances diluted with water, wring it dry and then wipe it.
5. Be careful not to break the filter.
6. Optical path dustproofing must be performed by professional engineers. Once the positioning of the LCD piece is damaged, it is difficult to restore, so optical path dustproofing is risky.
