Product Information

The Stage lights 54498 SIRIUS HRI 280W replacement lamps are compatible with 54498 SIRIUS HRI 280W projectors. The working hour time is: 3000-4800 hours. After replacing our new lamps, the projector performance can be the same as the original one and improve the effect of projection, and make you feel comfortable while using.

Adjust the screen size and position

Most projectors have options for adjusting the size and position of the projected image. You can typically find these options in the projector's menu system. Use the remote control or built-in buttons to navigate to the appropriate settings and make adjustments until the image fits within your desired screen or wall area.

Bulb warranty

Install the New Lamp: Take the new lamp and align it correctly with the lamp housing. Make sure it fits securely and matches the connections of the previous lamp. Reconnect any cables or connectors that were disconnected during the removal process.

Secure the Lamp Compartment: Once the new lamp is in place, secure the lamp compartment by reattaching any screws or latches that were removed earlier. Ensure that the compartment is sealed properly to prevent any dust or debris from entering.

Reset Lamp Timer: After installing the new lamp, it is essential to reset the lamp timer on the projector. This step varies by projector model, so refer to the user manual for instructions on how to reset the lamp timer.

Test and Calibrate: Turn on the projector and verify that the new lamp is functioning correctly. If necessary, adjust the projector settings to optimize the image quality and brightness.

While we are working to ensure each image we have posted is accurate, there may be items with an incorrect or missing image. Please be sure you are ordering the correct model.
