Product Information

The Acer MR.JKY11.00N replacement lamps are compatible with H7550BD H7550BDz H7550ST projectors. The working hour time is: 3000-5000 hours. After replacing our new lamps, the projector performance can be the same as the original one and improve the effect of projection, and make you feel comfortable while using.

Keystone Correction

Keystone correction is a feature that helps to correct the trapezoidal distortion of the projected image caused by the projector not being perfectly aligned with the screen. It ensures a rectangular image projection even when the projector is placed at an angle.

Bulb warranty

Install the New Lamp: Take the new lamp and align it correctly with the lamp housing. Make sure it fits securely and matches the connections of the previous lamp. Reconnect any cables or connectors that were disconnected during the removal process.

Secure the Lamp Compartment: Once the new lamp is in place, secure the lamp compartment by reattaching any screws or latches that were removed earlier. Ensure that the compartment is sealed properly to prevent any dust or debris from entering.

Reset Lamp Timer: After installing the new lamp, it is essential to reset the lamp timer on the projector. This step varies by projector model, so refer to the user manual for instructions on how to reset the lamp timer.

Test and Calibrate: Turn on the projector and verify that the new lamp is functioning correctly. If necessary, adjust the projector settings to optimize the image quality and brightness.
