Product Information

The OPTOMA 5811118082-SOT replacement lamps are compatible with W304M X304M projectors. The working hour time is: 3000-5000 hours. After replacing our new lamps, the projector performance can be the same as the new original one and improve the effect of projection, and make you feel comfortable while using.

Customer Support

Manufacturers typically have customer support channels, such as helplines or email support, where customers can reach out with their queries or concerns regarding projector bulbs. The customer support team can provide personalized assistance and address specific issues.

Bulb warranty

Most projector lamps come with a warranty. During the warranty period, if a bulb malfunctions or any defects are encountered, we will usually offer to replace or repair the bulb free of charge. Warranty duration varies by model.

Ensure Safety: Before starting the installation process, make sure the projector is turned off and has cooled down sufficiently. Unplug the projector from the power source to avoid any electrical accidents during the installation.

Allow Lamp to Cool: Projector lamps generate heat during operation. It is crucial to allow the lamp to cool down completely before attempting to replace it. This prevents the risk of burns or damage to the new lamp.

Secure the Lamp Compartment: Once the new lamp is in place, secure the lamp compartment by reattaching any screws or latches that were removed earlier. Ensure that the compartment is sealed properly to prevent any dust or debris from entering.
