Product Description

SP.70201GC01 SP.77011GC01 BL-FP210B For Optoma Projector Lamp DEAEXHGZ HD27D

Product Parameter

| | |
|---------------------------|--|
| Part Numbers | SP.70201GC01 SP.77011GC01 BL-FP210B |
| Fittable projector models | For Optoma Projector Lamp DEAEXHGZ HD27D, HD27D, HD28DSE, HD28DSE DH1012 |
| Bulb Type | 210 W |
| Life time | 3000-5000(Hours) |
| Packing | Carton box with foam |
| Minimum Order quantity | 10 piece |

Product Information

The Optoma SP.70201GC01 SP.77011GC01 BL-FP210B replacement lamps are compatible with HD27D HD27D HD28DSE projectors. The working hour time is: 3000-5000 hours. After replacing our new lamps, the projector performance can be the same as the new original one and improve the effect of projection, and make you feel comfortable while using.

After-sales service

The specifics of projector lamp after-sales service may vary from manufacturer to manufacturer. It is recommended to refer to the specific manufacturer's documentation or contact their customer support for accurate information on projector lamp after-sales service.

Bulb warranty

Most projector lamps come with a warranty. During the warranty period, if a bulb malfunctions or any defects are encountered, we will usually offer to replace or repair the bulb free of charge. Warranty duration varies by model.

Ensure Safety: Before starting the installation process, make sure the projector is turned off and has cooled down sufficiently. Unplug the projector from the power source to avoid any electrical accidents during the installation.

Allow Lamp to Cool: Projector lamps generate heat during operation. It is crucial to allow the lamp to cool down completely before attempting to replace it. This prevents the risk of burns or damage to the new lamp.

Secure the Lamp Compartment: Once the new lamp is in place, secure the lamp compartment by reattaching any screws or latches that were removed earlier. Ensure that the compartment is sealed properly to prevent any dust or debris from entering.
